

# AMIKIN<sup>Inj.</sup>

## Amikacin Sulphate 250mg. per ml ANTIBACTERIAL SOLUTION FOR INJECTION

- **Amikin** controls infections without any immunosuppressant effect.
- **Amikin** is resistant to the bacterial enzymes that inactivate other aminoglycosides.
- **Amikin** ensures excellent results in the respiratory & urogenital tract infections.
- **Amikin** is used clinically to treat severe Gram-negative infections in most species. It is often used in cases where gentamycin resistant bacteria are a clinical problem.
- **Amikin** is also used for intrauterine infusion.

### ► Indications Livestock

- Respiratory & urogenital tract infections
- Secondary bacterial infections associated with viral disease like Haemorrhagic gastroenteritis & Proteus infections.
- Post surgical care.
- Swine scours & Enteritis.
