

FLUNIL PLUS

Bolus

Two Together - Perform Better

Levamisole + Oxyclozanide

Synergistic combination

FLUNIL PLUS

Bolus

Each Bolus Contains:

Levamisole Hcl	I.P.	2 gm
Oxyclozanide	I.P. Vet	4 gm

LEVAMISOLE is an imidazothiazole that acts by interfering with parasite nerve transmission causing muscular paralysis. It is effective against adult & immature gastrointestinal round worm and lung worm infections.

OXYCLOZANIDE is a salicylanilide which act at more than one site to decrease levels of ATP leading to metabolic malfunction & death of the parasite. It is an excellent oral fasciolicide & is one of the most effective formulation for the treatment & control of Fascioliasis and Amphistomosis in Cattle, Buffaloe, Sheep, Goat & other Livestock.

Salient Features:

- Levamisole has been shown to be an effective alternative treatment in cases where anthelmintic resistance has developed to other chemically unrelated anthelmintics
- Levamisole has also garnered much interest as an immunostimulant.
- Levamisole is very rapidly absorbed & peak plasma concentration attained within 1-3 hrs. after oral dosing.
- Levamisole is rapidly distributed to all tissues and elimination from plasma & tissues is also very rapid, in urine 50% & faeces 30% within 24 hrs.
- Oxyclozanide is slowly absorbed after oral administration with peak plasma levels 24 hrs after dosing. Excretion is predominantly faecal.
- Oxyclozanide is not mutagenic or structurally related to a known carcinogenic.
- Oxyclozanide also removes tape worm (moniezia spp.) in sheep.
- Elimination half life of Oxyclozanide is about 24 hrs. During 5 days after administration 84% of the dose was excreted in faeces, 7.5% in urine & less than 0.07% in milk.

Indications:

For the treatment & control of both gastrointestinal & pulmonary nematode infestation & adult liver fluke infestation. **Flunil Plus** also removes most mature Fasciola spp. (flukes) present in the bile ducts of the liver.

Dosage:

Large Animals :	1 bolus
Small Animals :	½ bolus

Single dose orally to be repeated after 3-4 months or as required.

Presentation:

1 Bolus Strip
